			[Q][integration] Choose your answer from FAIRsharing			
				[Q][list] A1.1 Which standardized communication protocol are you	u using for datasets? [Q][string] If you do not	see your resource in FAIRsharing, then add your resource description here
				[Q][text] Consideration		
				[Q][integration] Choose your answer from FAIRsharing		
			Accessibility	[Q][list] A1.2 Which authorization procedure are you using for metadata records? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here		our resource in FAIRsharing, then add your resource description here
				[Q][text] Consideration		
					[Q][integration] Choose your answer from FAIRsharing	
			[Q][list] A1.2 Which authorization procedure are you using for datasets? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here			
				[Q][text] Consideration		
			[Q][integration] Choose your answer from FAIRsharing			
				[Q][list] A2 Which metadata longevity plan do you use? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here		
Background: The FAIR Implementation Profile				[Q][text] Consideration		
[Q][string] Name of the FAIR Implementaton Community (FIC)						[Q][integration] Choose your answer from FAIRsharing
[Q][string] Give a short "about" statement describing the FIC				[Q][list] I1 Which knowledge representation languages (allowing	g machine-interoperation) do you use for metadata record	ls? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here
[Q][string] Supporting link [Q][list] Add supporting links				[Q][text] Consideration		[Q][text] Consideration
[Q][text] Brief description of the link				[Q][integration] Choose your answer from FAIRsharing		
[Q][integration] Add research domain	FAIR Implementation Community			[Q][list] I1 Which knowledge representation languages (allowing	g machine-interoperation) do you use for datasets?	[Q][string] If you do not see your resource in FAIRsharing, then add your resource description here
[Q][text] FIC Contact				[Q][text] Consideration [Q][integration] Choose your answer from FAIRsharing [Number operability [Q][list] 12 Which vocabularies do you use for your metadata records? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here		[Q][text] Consideration
[Q][string] FIC Contact ORCID						from FAIRsharing
[Q][text] FIC Contact email address		FIP Wizard	Interoperability			urce in FAIRsharing, then add your resource description here
[Q][date] Date of FIC/FIP creation or update		FIF WIZAID			[Q][text] Consideration	
[Q][integration] Choose your answer from FAIRsharing				[Q][integration] Choose your answer from FAIRsharing [Q][list] I2 Which vocabularies do you use for your datasets? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here		
[Q][string] If you do not see your resource in FAIRsharing, then add your resource description here [Q][list] F1 What globally unique, persistent, resolvable identifiers do you use for metadata records?						AIRsharing, then add your resource description here
[Q][text] Considerations				[Q][text] Consideration		
[Q][integration] Choose your answer from FAIRsharing				[Q][integration] Choose your answer from FAIRsharing [Q][list] I3 Which models, schema(s) do you use for your metadata records? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here [Q][text] Consideration		
[Q][string] If you do not see your resource in FAIRsharing, then add your resource description here [Q][list] F1 What globally unique, persistent, resolvable identifiers do you use for datasets?						ur resource in FAIRsharing, then add your resource description here
[Q][text] Consideration						
[Q][integration] Choose your answer from FAIRsharing					[Q][integration] Choose your answer from FAIRsharing	
[Q][string] If you do not see your resource in FAIRsharing, then add your resource description here [Q][list] F2 Which metadata schema(s) are you using for findability? Findability		J		[Q][list] I3 Which models, schema(s) do you use for your datase	ets? [Q][string] If you do not see your resource	ce in FAIRsharing, then add your resource description here
[Q][text] Consideration					[Q][text] Consideration	
[Q][integration] Choose your answer from FAIRsharing			[Q][integration] Choose your answer from FAIRsharing			
you do not see your resource in FAIRsharing, then add your resource description here [Q][list] F3 What is the technology that links the persistent identifiers of your data to the metadata description?			[Q][list] Which license do you use for your metadata records? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here			
[Q][text] Consideration					[Q][text] Consideration	
[Q][integration] Choose your answer from FAIRsharing				[Q][integration] Choose your answer from FAIRsharing		
[Q][string] If you do not see your resource in FAIRsharing, then add your resource description here [Q][list] F4 In which searchable resources are your metadata records indexed?			Reusability	[Q][list] Which license do you use for your datasets? [Q][string] If you do not see your resource in FAIRsharing, then add your resource description here		
[Q][text] Consideration				[Q][text] Consideration
